

**What is the Policy and its intent?**

**What Problem does Policy attempt to solve or prevent?**

Non-Natural Resource or Mixed Env/Econ/.Social?

Direct Natural Resource issue?

Proceed to Natural Resource Diagnosis

**Keep in Mind:**  
 Is there a clear holisticgoal/vision/goal/etc?  
 Is the Whole identifiable and manageable?  
 Are their multiple layers of wholes or decision-makers?  
 Can you get your head around it?

What is underlying cause of 'problem'?

Use Natural Resource Diagnosis for Natural Resource Elements, if any

**Addressing Underlying Cause?**  
 If not, probably not sound.

**Addressing Underlying Cause?**  
 If not, probably not sound.

Look to Start the Sale to stakeholders/those affected as soon as appropriate

**Deep Reflection**  
 Sound Policy?

No

**Skeletal Structure**

Additional Test toward vision/holisticgoal –  
 1. Bio Weak Link  
 2. Marginal Reaction  
 3. Logjam? \$\$ Weak Link?  
 4. E/M S/U  
 5. Society/Culture

Run through:

- What does the problem prevent the people in this Whole from achieving?
- How manageable is the whole? – look for subsets/layers, including the right people as resources and/or decision-makers (Check!)
- Need to clarify direction of organization/whole (holisitgoal/vision/etc)?
- Which tests failed and how can they pass?
- Ask 5 Why's for failures
- Options available? Simple Appreciation
- Test Again
- Use Creativity

Failed. Revisit.

Sound, No Changes to Policy Needed

**Create A Strategy**  
 Support, Awareness, Educational Campaign, Sell to Authorities

**Monitor, and Control as Needed.**
